WORK EXPERIENCE

AI Marketplace platform   Jan 2025 - Present
Frontend Developer
Tech Stack: Nuxt.js, NaiveUI, Nest.js, PostgreSQL
- Engineered a platform for buying and selling models and datasets, featuring a space for experimentation.
- Spearheaded front-end development for authentication features, transaction functionalities, and user settings.

VM Rental & Management Platform   Apr 2024 - Aug 2024
Frontend Developer
Tech Stack: Nuxt.js, DaisyUI, Nuxt Server-Side (Backend), MongoDB
- Created a platform for renting virtual machines (VMs) with options for OS, CPU, RAM, and storage selection, along with integrated payment processing.
- Pioneered frontend development for user authentication features, product selection, and management of virtual machines (VMs) through a user-friendly terminal interface.
- Designed and implemented features for generating invoices and tax receipts (personal and company) in PDF format.

Botnoi Group (Internship)   May 2024 - Jun 2024
Frontend Developer
Tech Stack: Angular, Bootstrap, Golang
- Contributed to the development of the Botnoi Voice website by implementing the landing page per UX/UI designs.
- Managed admin features, including editing voice data and adjusting credit balances.

Condo and Dormitory Finder Website   Jan 2024 - Apr 2024
Frontend Developer
Tech Stack: Next.js, MUI, Nest.js, PostgreSQL
- Developed a platform that recommends condos and dormitories based on user preferences.
- Responsible for admin features, including article writing using React Quill, allowing text customization (size, color, decoration), and image insertion with adjustable sizing.

ACADEMIC CONTRIBUTIONS

Software Thesis Management and Vulnerability Assessment Platform (Bachelor's Thesis)   Jul 2024 - Mar 2025
Frontend Developer
Tech Stack: Nuxt.Js, DaisyUI, Nest.js, PostgreSQL
- Constructed a platform for vulnerability assessment using SonarQube and Nuclei to analyze source code and URLs.
- Spearheaded frontend development for OAuth authentication for secure login and established project group configurations by advisors for access control, along with frontend development of features allowing users to upload source code and URLs, display scan results, and facilitate submissions for instructor review and grading.
